The diagram illustrates a mechanical linkage system with three operating positions, each corresponding to a different angle of inclination (α) relative to the horizontal:

- Position 1:** Inclination angle $\alpha = 80^\circ$. The maximum allowed load is 3200 Kg (7070 lbs).
- Position 2:** Inclination angle $\alpha = 45^\circ$. The maximum allowed load is 2150 Kg (4740 lbs).
- Position 3:** Inclination angle $\alpha = 12^\circ$. The maximum allowed load is 1450 Kg (3200 lbs).

Below the diagram, a table provides the maximum allowed load for various angles of inclination (α) from 0° to 80° .
